PROFESSIONAL SUMMARY

Dynamic software engineer with over four years of experience in developing scalable RESTful backend services for FinTech and AI applications. Proficient in clean architecture, event-driven systems, and data modeling, ensuring reliability at scale through hands-on expertise in Python FastAPI, Rust Actix, SQL Oracle, Redis, and cloud databases on AWS and Azure. Recognized for exceptional problem-solving skills and a commitment to quality through effective code reviews and refactoring practices, particularly within high-volume payment systems.

EXPERIENCE

Role: SDE II| Karbon Business | Oct 2024 - Present

- Spearheaded Finbox integration for AI accountant, automating bank statement parsing (PDF/Excel/images) with Python FastAPI; reduced manual effort by 70%, enhanced accuracy to 98%, elevated onboarding rate by 40%.
- Engineered AIIS APIs incorporating real-time tally synchronization, idempotency retries, and reconciliation for precise delivery at scale.
- Developed tally AIA connector Windows app facilitating bidirectional exchange for AP AR journal vouchers; optimized flows resulting in 3x increase in user adoption supporting 500+ active users with enhanced onboarding.
- Orchestrated migration of more than 50 GB data to cloud environments, ensuring uninterrupted service. Enhanced end-to-end prepaid card processes, resulting in 95 million monthly GTV with no operational failures.
- Handled critical on-call issues in onboarding flows, restoring services 95% faster; optimized pipelines across all services, improved test coverage 80%, reduced failures 50%.
- Self-motivated, with a strong sense of personal responsibility and have worked effectively in fast-paced environments.
- Proved successful working within tight deadlines and a fast-paced environment.

Role: Backend Engineer| Juspay | Sep 2022 - May 2024

- Demonstrated deep understanding of Recon microservices and system architecture, applying it to solve complex problems in payment reconciliation.
- Led code refactoring efforts, streamlining codebase, boosting efficiency, and enhancing maintainability by 40%.
- Collaborated with cross-functional teams to build generic APIs for efficient data access and cron jobs for automated tasks, enabling seamless database operations.
- Leveraged system design expertise to manage ETL jobs, ensuring smooth data processing and merchant integrations organization-wide.
- Developed and maintained scalable backend services for high-traffic payment applications, handling millions of transactions daily.
- Collaborated with cross-functional teams to design API architectures and streamline integration processes, reducing latency 30%.
- Implemented automated deployment pipelines with Docker/Jenkins, accelerating releases 50% and minimizing downtime to under 1%.

Role: Technical Product Analyst Intern | Juspay | Feb 2022 - Aug 2022

- Designed and architected a scalable logging system with Kafka real-time data pipeline for efficient log collection and analysis, demonstrating system design and database expertise.
- Built user-friendly analytics dashboard with Kibana-like visualizations, delivering real-time insights and showcasing data analysis, UI design, and presentation skills.
- Collaborated with cross-functional teams to refine product features based on customer feedback, accelerating iterations by 25%.
- Optimized data collection processes, improving analysis accuracy 95% and reliability for high-stakes fintech decisions.

TECHNICAL SUMMARY

Languages : Python OOPS, R , Django, FastAPI , Rescript, Rust, Actix, Prompt Engineering

Databases : PSQL , SQL , BigQuery , Clickhouse

Build Tools :Jenkins , Docker , Configuration Management Tools

Logging Frameworks and Monitoring : Kibana, Kali, Log Viewer

Version Control : BitBucket, Github

Bug / Defect Tracking Tools : JIRA

Other Skills : System architecture design, Distributed systems, Microservices architecture, Cloud computing (AWS, Azure), Scalability and performance optimization, Security and data privacy, API design and integration, Reliability engineering , Technical leadership

EDUCATION BACKGROUND -

BE (Information Technology), Chandigarh University, India

(2019-2023)
